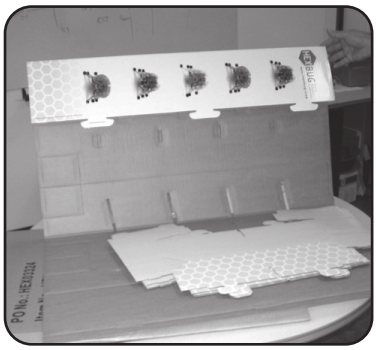
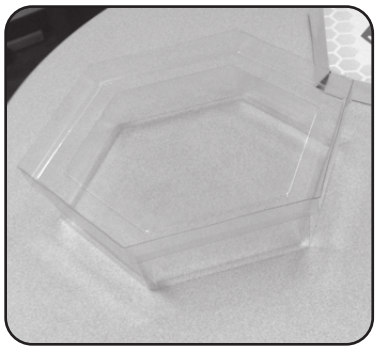
HEXBUG-POP

What's included...



(1) Base unit
(4) Shelves



(1) Plastic topper

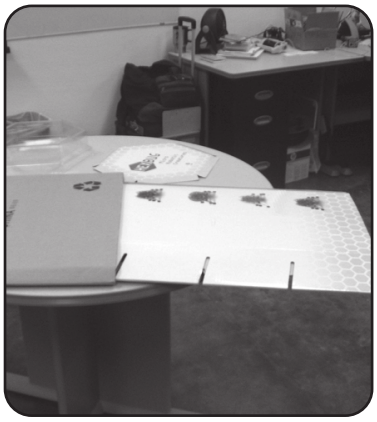
(1) Cardboard topper

(40) AG13/LR44 Button cells

Batteries may differ from those shown. Batteries are NOT FOR RESALE, but for demonstration purposes only.

Step by step

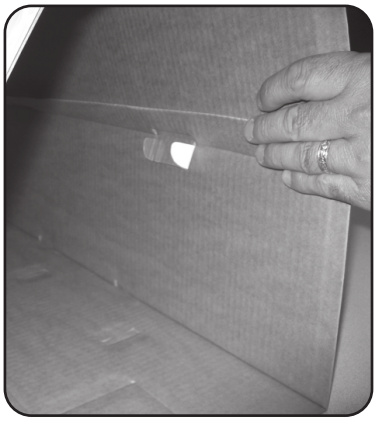
Assembly



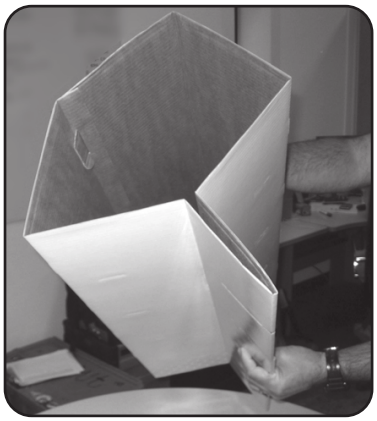
Step 1
Unpack base unit, shelves from its packing sleeve. Unpack the plastic and cardboard toppers and batteries from their ship carton.

Step 2
Fold the (3) tabs on the edge of the base unit and then fold the base unit to form a rough, hexagonal cylinder.

Step 3
Insert folded tabs into the slots along the fold line. NOTE the fold line flap on the base unit should be on the inside of the base unit.

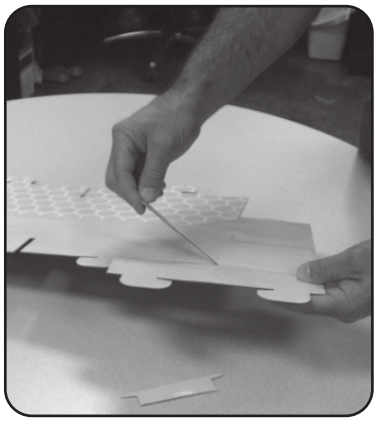


Step 4
Looking inside the cylinder of the base unit open the folded tabs so they are locked in place.

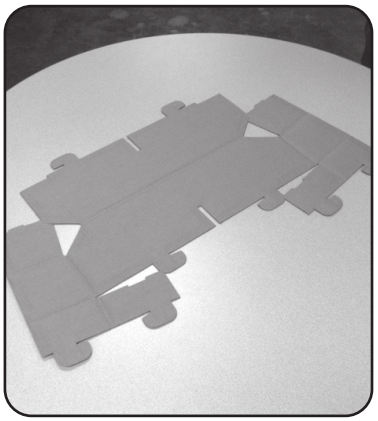


Step 5
Fold the front of the base unit along the fold lines so that it forms the shape pictured above.

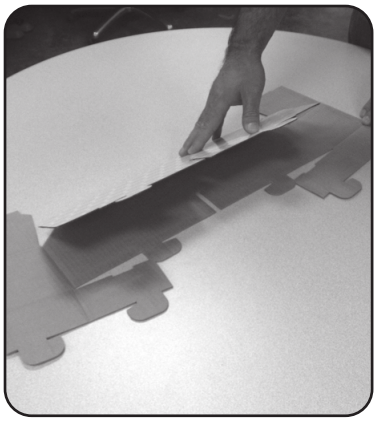
Step 6
Locate the (4) shelf parts.



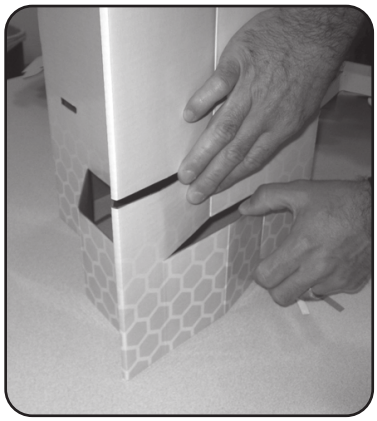
Step 7
Remove the punch-outs from each of the (4) shelf parts.



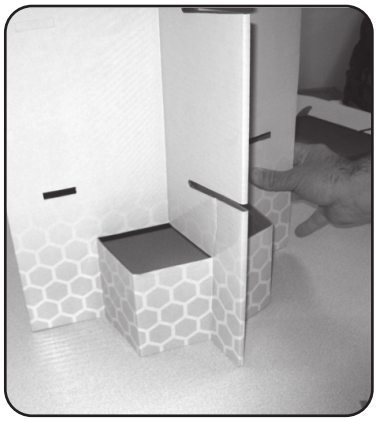
Step 8
Place the shelf unit print side down on a flat, even surface.



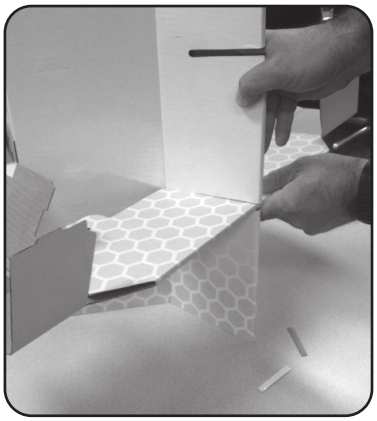
Step 9
Fold the center part of the shelf unit along its fold line so that it looks like the image above.



Step 10
On the bottom of the base unit, fold out each of the two stabilizer feet. This needs to be done before any shelf units are assembled into the base unit.



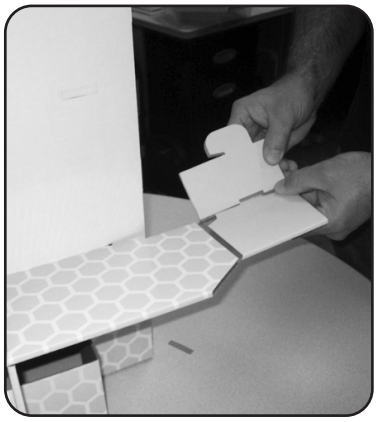
Step 11
With each of the stabilizer feet folded out, the base unit front should look like the image above.



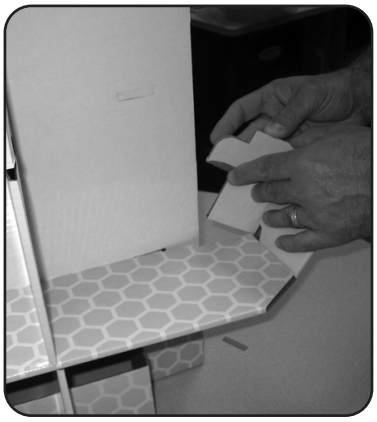
Step 12
With the hex pattern facing up, insert the folded shelf unit into the lowest angled slot on the front of the base unit.

Step 13
With the shelf unit in place fold both tabs along its edge and insert them into the slots on the base unit.

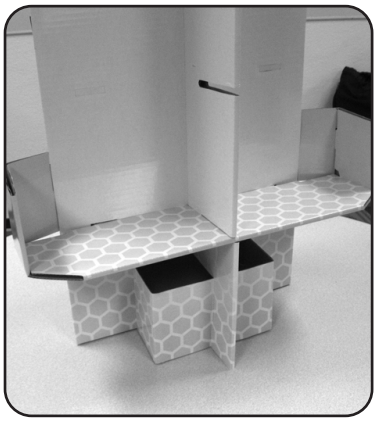
Step 14
Looking inside of the base unit, make sure the shelf units tabs are inserted fully. Open the folded tabs so they are locked in place.



Step 15
Fold the shelf units corners along the fold lines so that the printed gray sides are facing upward.

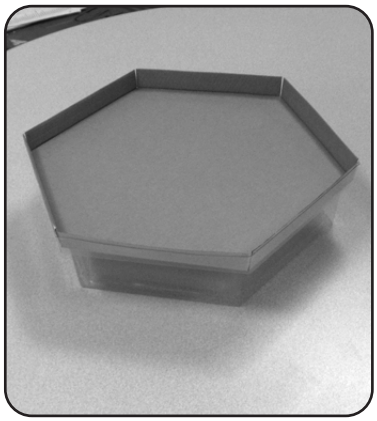


Step 16
Fold the tabs on the shelf unit and insert them into the slots along the fold line of the base unit.



Step 17
Installed shelf unit should match image above. Repeat steps 9, 12, 13, 14, 15 and 16 for the other (3) shelf units.

Step 18
With all (4) shelf units in place locate the plastic topper and cardboard topper. Place the plastic topper upside down.



Step 19
Fold the flaps on the cardboard topper downward, along the fold lines and insert it print side down onto the plastic topper.

Step 20
Place assembled topper on the assembled base unit so that HEXBUG logo faces the front of the unit.
